PRECEDENT

AI-Assisted Brand Governance & Content Approval Platform

MASTER FEATURE CATALOG & WEBSITE DIRECTORY • VERSION 2.0 (NOVEMBER 2026)

Executive Summary: Precedent is an enterprise-grade brand governance platform enforcing the principle: *'Deterministic rules decide. AI suggests. Humans approve.'* The application provides **21 fully integrated production screens** across two persona workspaces (Brand Manager and Creator), a visual **AI Agent Studio** with React Flow execution graphs, an in-app grounded **Precedent Assistant**, and a 5-agent sequential **Review Crew**. This directory lists every feature, exact route, UI placement, and functional scope.

Verified Demo Credentials & Live Endpoints

Role / Persona	Seed Email	Password	Default Landing	Key Responsibilities
Brand Manager	`david.kim@pureglow.co`	`precedent`	`/manager/overview`	Policy authoring, final approval/rejection, agent builder, audit review
Content Creator	`emily.carter@pureglow.co`	`precedent`	`/app/overview`	Content drafting, pre-flight brand check, diff studio, exception filing

1. Public & Authentication Routes

Accessible without prior authentication. Handled by root router.

Route URL	Feature Name	Screen ID	Core Capabilities & Interactive Behaviors
`/`	**Public Landing Page**	PUBLIC	Product value proposition, interactive governance flow explainer, live feature overview, and primary sign-in action links.
`/login`	**Authentication Portal**	AUTH	Server-verified Argon2 password authentication, JWT token issue, and 1-click persona quick-switch buttons (David Kim / Emily Carter).

2. Brand Manager Workspace (`/manager/*`)

Complete brand governance suite for compliance officers, legal counsel, and brand directors.

Route / Path	Feature & Menu	Code	Detailed Capabilities & Real DB Interactions
`/manager/overview`	Command Center *Sidebar: Overview*	M01	Live compliance health score, pending decision aggregates, recent audit events stream, workspace drift alerts, and fast navigation pills.

`/manager/queue` `/manager/queue/:id`	Review Queue & Decision Workspace *Sidebar: Review Queue*	**M02** **M04**	5-Agent Review Crew runner. Inspect submission copy and visuals, exact rule violations cited against policy text, visual OCR overlays, and issue Approve, Reject, or Request Changes with immutable audit stamps.
`/manager/submissions`	All Submissions Register *Sidebar: All Submissions*	**M03**	Full-width tabular register matching screenshot 1. Multi-column toggle, status filtering, search by title/creator/campaign, score breakdown popover modal, and CSV export.
`/manager/guidelines` `/manager/rules`	Guidelines & Rules Manager *Sidebar: Guidelines & Rules*	**M05** **M06**	Manage brand policy documents (PDF, DOCX, Markdown). View, create, and edit deterministic rules with severity weights (Critical, High, Medium, Low), claim mappings, and passage citations.
`/manager/exceptions`	Exceptions Center *Sidebar: Exceptions*	**M04**	Review pending policy exemption requests filed by Creators. Assess business justifications, set expiration dates, approve/deny with formal ruling rationale.
`/manager/sandbox`	Rule Impact Sandbox *Sidebar: Rule Impact Sandbox*	**M07**	What-If simulation engine. Test new or draft rules against historical submission datasets to evaluate potential pass/fail drift and false positive rates prior to activation.
`/manager/sentinel`	Sentinel Monitoring *Sidebar: Sentinel Monitoring*	**M08**	Continuous retrospective compliance scanner. Automatically re-evaluates previously approved content when guidelines change. Configure cron schedules and auto-generate creator reassessment tasks.
`/manager/assets`	Asset Library *Sidebar: Asset Library*	**M09**	Digital Asset Management (DAM) for approved logos, color palettes, fonts, and imagery. Includes automated OCR text extraction and status tagging (Approved, Deprecated, Review).
`/manager/analytics`	Analytics & Health *Sidebar: Analytics & Health*	**M10**	Interactive compliance score trends, top violated rules heatmap, submission review cycle times, and AI engine observability (latency, token costs, fallback frequencies).
`/manager/audit`	Audit History *Sidebar: Audit History*	**M11**	Tamper-evident, chronological log of all security events, logins, AI tool calls, rule evaluations, and manager decisions with full JSON diff modal inspection.

3. AI Agent Studio (`/manager/agent-studio` & Sub-Routes)

Native n8n-inspired visual workflow and natural language agent building suite.

Route / Path	Feature & View	Scope	Key Capabilities & Execution Mechanics
`/manager/agent-studio` `/manager/agents`	Agent Studio Dashboard *Sidebar: Agent Studio*	Studio Hub	Gallery of workspace agents, real-time success rates, template selector (Reviewer, Sentinel, Auditor), and **'Prompt-to-Agent' natural language generator modal**.
`/manager/agents/:agentId`	Agent Configuration *Agent Detail*	Config	Configure agent system instructions, temperature, model selection, memory retention policies, permission restrictions, and tool whitelists.
`/manager/agents/:agentId/builder`	React Flow Visual Builder *Workflow Canvas*	Visual Editor	Interactive drag-and-drop workflow canvas powered by `@xyflow/react`. Connect trigger nodes, tool execution nodes, logic checkpoints, and output actions with connection validation and test runs.
`/manager/agent-runs`	Agent Executions Log *Sidebar: Agent Executions*	Runs Log	Chronological execution records of all automated and manual agent runs. Real database tracking of run status (Success, Failed, Running), trigger type, duration, and latency.
`/manager/agent-runs/:runId`	Execution Trace Inspector *Run Trace Deep-Dive*	Inspector	Comprehensive node-by-node execution autopsy. Inspect exact tool inputs and outputs, step durations (ms), deterministic tool calls, and error stack traces.

4. Content Creator Workspace (`/app/*`)

Dedicated workflow environment for copywriters, agencies, designers, and marketing contributors.

Route / Path	Feature & Menu	Code	Creator Tooling & Real-Time Feedback Loop
`/app/overview`	Creator Overview *Sidebar: Overview*	C01	Personal compliance score tracker, active submission states, quick-action draft launchers, and recent manager review notifications.
`/app/new`	New Submission Studio *Sidebar: New Content*	C02	Content editor with file drag-and-drop, metadata tagging, and instantaneous **Pre-Flight Brand Check** giving immediate feedback before formal submission.
`/app/submissions`	My Submissions Register *Sidebar: My Submissions*	C03	Personal submission history with filter pills (All, In Review, Approved, Needs Changes), live status tracking, and quick link to diff studio.
`/app/feedback` `/app/feedback/:id`	AI Review & Diff Studio *Sidebar: AI Review*	C04	Side-by-side interactive diff viewer. Offending words highlighted with severity badges, verified policy citations, and 1-click 'Apply Suggestion' actions.
`/app/guidelines`	Brand Guidelines Explorer *Sidebar: Brand Guidelines*	C05	Searchable, creator-friendly knowledgebase of brand voice, acceptable cosmetic claims, prohibited terminology, and typography rules.

`/app/exceptions`	Exception Requests *Sidebar: Exception Requests*	C06	Submit policy exemption petitions for specific seasonal campaigns. Track manager decisions, active exemption timeframes, and reviewer notes.
`/app/sentinel`	Sentinel Tasks *Sidebar: Sentinel Tasks*	C07	Action queue for content flagged retrospectively by Sentinel drift scans. View exact rule modifications and update copy to regain compliance.
`/app/approved`	Approved Content Hub *Sidebar: Approved Content*	C09	Catalog of certified, manager-approved content versions with one-click copy, download, and immutable version certificates.
`/app/notifications`	Notifications Center *Sidebar: Notifications*	C08	Real-time feed of approval events, required revisions, exception rulings, and Sentinel reassessment alerts with read/unread tracking.
`/app/profile`	Creator Profile & Preferences *Direct / User Menu*	C10	User account settings, avatar tone, active workspace details, notification frequency preferences, and session termination.
`/app/ai-assistants`	My AI Assistants *Sidebar: My AI Assistants*	CREATOR	Execute published AI brand assistants assigned to creators by managers for copy assistance, claim verification, and pre-validation.

5. Global Persistent Services (Active on All 21 Screens)

Cross-cutting platform features that operate continuously across both workspaces.

Feature Component	Visual Placement	Backend Engine / Endpoint	Operational Functionality
Precedent Assistant (In-App Chatbot)	`Floating launcher dot at bottom-right of every screen; sliding drawer UI.`	`/api/v1/assistant/* Hybrid passage retriever & prompt fencing.`	Grounded brand knowledge answering. Generates exact guideline passage citations, validates citations against DB text, and accepts user feedback (■ / ■).
Review Crew (5-Agent Governance)	`Integrated in Review Queue & Submission detail views.`	`POST /api/v1/submissions/{id}/review-crew`	Sequential governance pipeline: **Intake** → **Rules** → **Evidence** → **Visual OCR** → **Synthesis**. Logs every step to agent_runs and agent_tool_calls.
Dynamic Navigation Badges	`Sidebar navigation items (Review Queue, Exceptions, Submissions).`	`GET /api/v1/nav/counts SQL aggregate queries.`	Zero-mock counts: badges dynamically reflect real database rows (e.g. Review Queue 11, Open Exceptions 2, Emily's Submissions 14).
Fast Persona Switcher	`Top header navigation bar on all authenticated pages.`	`Client-side JWT swap & auth context sync.`	Instant 1-click toggle between David Kim (Brand Manager) and Emily Carter (Creator) to evaluate user permissions and role-based views without re-authenticating.

6. Complete System Route & Navigation Map

Hierarchical sitemap showing URL paths, component implementations, and role guards:

Path	Component File	Role Guard	Alias / Alternate Path
/	`src/pages/marketing/Home.tsx`	Public	None
/login	`src/pages/Login.tsx`	Public	None
/manager/overview	`src/pages/manager/Overview.tsx`	`manager`	`/manager`
/manager/queue	`src/pages/manager/Queue.tsx`	`manager`	`/manager/review-queue`
/manager/submissions	`src/pages/manager/AllSubmissions.tsx`	`manager`	None
/manager/guidelines	`src/pages/manager/GuidelinesRules.tsx`	`manager`	`/manager/rules`
/manager/exceptions	`src/pages/manager/Exceptions.tsx`	`manager`	None
/manager/sandbox	`src/pages/manager/Sandbox.tsx`	`manager`	None
/manager/sentinel	`src/pages/manager/SentinelMonitoring.tsx`	`manager`	None
/manager/assets	`src/pages/manager/AssetLibrary.tsx`	`manager`	None
/manager/analytics	`src/pages/manager/AnalyticsHealth.tsx`	`manager`	None

/manager/audit	src/pages/manager/Audit.tsx	manager	None
/manager/agent-studio	src/pages/manager/AgentStudio.tsx	manager	/manager/agents
/manager/agents/:id	src/pages/manager/AgentDetail.tsx	manager	None
/manager/agents/:id/builder	src/pages/manager/WorkflowBuilderPage.tsx	manager	None
/manager/agent-runs	src/pages/manager/AgentRunsPage.tsx	manager	None
/manager/agent-runs/:runId	src/pages/manager/AgentRunDetailPage.tsx	manager	None
/app/overview	src/pages/content/Overview.tsx	creator	/creator/dashboard
/app/new	src/pages/content/NewContent.tsx	creator	/creator/new-content
/app/submissions	src/pages/content/Submissions.tsx	creator	/creator/submissions
/app/feedback/:id	src/pages/content/Feedback.tsx	creator	/creator/ai-review
/app/guidelines	src/pages/content/Guidelines.tsx	creator	/creator/guidelines
/app/exceptions	src/pages/content/CreatorExceptionRequests.tsx	creator	/creator/exception-requests
/app/sentinel	src/pages/content/CreatorSentinelTasks.tsx	creator	/creator/sentinel-tasks
/app/notifications	src/pages/content/CreatorNotifications.tsx	creator	/creator/notifications
/app/approved	src/pages/content/CreatorApprovedContent.tsx	creator	/creator/approved-content
/app/profile	src/pages/content/CreatorProfile.tsx	creator	/creator/profile
/app/ai-assistants	src/pages/content/CreatorAssistants.tsx	creator	/creator/ai-assistants
